

Copilot

It looks like the error is related to the `choco` package, which is trying to use `time.clock`, a function that has been removed in Python 3.8. Here are some steps to resolve this issue:

Step 1: Update the choco Package

Check if there's an updated version of the `choco` package that is compatible with your Python version. You can update the package using `pip`:

```
pip install --upgrade choco
```

Step 2: Modify the choco Package (Temporary Fix)

If updating the package doesn't work, you can manually modify the `choco` package to use `time.perf_counter` instead of `time.clock`. Here's how:

1. Locate the choco package:

- Find the `choco` package directory. It should be in your Python site-packages directory, something like `C:\Users\Shimpi\AppData\Local\Programs\Python\Python312\Lib\site-packages\choco`.

2. Edit the `compat.py` file:

- Open `compat.py` in a text editor and replace `time.clock` with `time.perf_counter`:

```
# Original line
time_func = time.clock

# Modified line
time_func = time.perf_counter
```

Step 3: Re-run the Coverage Command

After making the changes, try running the coverage command again:

```
py -m gcovr -r .. --html --html-details -o coverage.html
```

Step 4: Verify the Coverage Report

Open the `coverage.html` file in a web browser to view the code coverage details.

Summary

1. Update the `choco` package.
2. If necessary, manually modify the `choco` package to use `time.perf_counter`.
3. Re-run the coverage command.
4. Verify the coverage report.
